EU AI ACT ART 4

MSP-RESELLABLE

AISAFEATWORK.ORG • EXCEL LONDON • 3-4 JUNE 2026

SMB LITERACY

The niche, in one breath.

- **324 stands** scraped from Infosec Europe 2026 exhibitor directory · taxonomied into 12 categories.
- **Direct competitive zone:** 14 Security Awareness Training (SAT) vendors + 6 AI-Governance platforms = **20 stands**.
- **Pattern:** SAT vendors bolt AI onto phishing libraries · AI-Gov vendors sell policy engines to enterprise legal teams. **Nobody leads with EU AI Act Article 4 literacy.**
- **Closest threat:** Adaptive Security (US, deepfake-led, premium, no MSP shape).
- **Open slot:** SMB-priced · EU-first · plain-English · MSP-resellable · Article-4-anchored literacy.

DEFENSIBLE NICHE

The Article 4 AI-literacy pack KnowBe4 doesn't ship and OneTrust doesn't sell — built for SMB staff, priced for MSP resale, evidenced for the EU auditor.

TOTAL EXHIBITORS

324

Deduped from advertised 325 (sponsor duplicates removed).

DIRECT COMPETITORS

20

14 SAT + 6 AI-Gov platforms.

OUT-OF-SCOPE ADJACENTS

~250

EDR · IAM · SIEM · pentest · cloud · backup — partner targets, not threats.

DAYS TO SHOW

7

3-4 June 2026 · ExCeL London. Pre-show outreach window closing.

1 · Exhibitor taxonomy — 324 stands across 12 categories

#	CATEGORY	COUNT	SAMPLE NAMES	OVERLAP
1	Security Awareness Training (SAT)	~14	KnowBe4 · MetaCompliance · CybSafe · SucceedLEARN · VIVIDA · Redflags · PhishRod · Adaptive Security · Hornetsecurity · Immersive · TryHackMe · Antisyphon · SANS · SecureFlag	DIRECT — core competitive zone
2	AI Governance / AI-GRC	~6	Securiti AI · OneTrust · Concentric AI · Diligent · Compyl · Sprinto (AI module)	DIRECT but enterprise-shaped
3	AI model security / red-team	~7	Mindgard · DeepKeep · Validaitor · NeuralTrust · Noma · Horizon 3 AI · FireTail	Adjacent — out-of-scope by design
4	AI-aware DLP / prompt-filter	~7	Harmonic · LayerX · Cyberhaven · Metomic · Push · Island · Menlo	Adjacent — referral partners
5	Deepfake / impersonation / voice	~4	Doppel · Memcyco · Resemble AI · Abnormal AI	Module 6 content · referral partners
6	AI-powered SOC analyst	~6	Dropzone ai · Qevlar AI · Radiant · Aurigin · Airia · Darktrace	Out-of-scope · not a competitor
7	GRC / vendor-risk / TPRM	~22	Vanta · Sprinto · OneTrust · Risk Ledger · SecurityScorecard · UpGuard · Panorays · Cybervadis · VENDICT · Avertro · FAIR · Setyl · Plainsea · Privicore · Diligent	Adjacent — AUP + vendor questionnaire intersects
8	Identity / IAM / PAM / MFA	~25	Okta · JumpCloud · SailPoint · Saviynt · Sectona · 1Password · Keeper · LastPass · Yubico · Feitian · Specops · Curity · IDEE · heylogin · XFA · Native · Riot · DigiCert · Keyfactor	Out-of-scope · bundling opportunity
9	Endpoint / EDR / MDR / RMM	~30	SentinelOne · Bitdefender · ThreatLocker · Huntress · Arctic Wolf · Acronis · Halcyon · NinjaOne · Tanium · Jamf · Hexnode · Action1 · N-able · Atera · ManageEngine · Patch My PC · Lansweeper · Ontinue · SecurityHQ · Bridewell · ThreatSpike	Out-of-scope · MSP-channel goldmine
10	SIEM / SOAR / XDR / TI	~25	Exabeam · Gurucul · Sumologic · Senseon · Darktrace · BlinkOps · Torq · Tines · Swimlane · Cyware · Filigran · Recorded Future · Silobreaker · Dataminr · Intel 471 · Silent Push · SOCRadar	Out-of-scope
11	Pentest / VM / ASM / AppSec	~30	HackerOne · Bugcrowd · YesWeHack · Cobalt · Pentera · NetSPI · Pen Test Partners · Detectify · Hadrian · Outpost24 · watchTower · Rapid7 · Qualys · XBOW · PlexTrac · Rootshell · Nucleus · AttackIQ · XM Cyber · runZero · REVERSINGLABS · Mend.io · Sonatype · Semgrep · SCANOSS · JFrog · Black Duck	Out-of-scope

#	CATEGORY	COUNT	SAMPLE NAMES	OVERLAP
12	Network · cloud · backup · distributors · associations · theatres	~50	Cloudflare · Cato · Akamai · Infoblox · Cohesity · Rubrik · Bytes · Distology · Northamber · Infinigate · ISC2 · ISACA · OWASP · IASME · UK Cyber Security Council · CSA · Frost & Sullivan · DSIT	Out-of-scope · channel + cert partners

Counts approximate; pavilions + theatres + organiser stand excluded. Several stands fit multiple categories — counted once at primary fit.

2a · Direct competitors — Security Awareness Training

VENDOR	WHAT THEY DO	WHERE THEY OVERLAP	WHERE THEY'RE WEAK VS US
KnowBe4	World's largest SAT library + phishing sim	Has AI / deepfake modules in library	Generalist · US-NIST framing · phishing-led not AI-led · premium per-seat
MetaCompliance (UK)	Compliance-first SAT + policy mgmt	GDPR + ISO comfort	Compliance-heavy · not AI-literacy-led · enterprise-shaped
CybSafe (UK)	Behavioural-science SAT	UK-EU framing	No AI Act anchor · no MSP wholesale shape
SucceedLEARN	SAT + phishing	Generic SAT	No AI specialism · no standards map
VIVIDA	Security culture at scale	Culture programme	Enterprise-only · not staff-literacy
ThinkCyber Redflags	Real-time SAT nudges	UK · behavioural	No AI specialism · not MSP-priced
PhishRod	Phishing sim + SAT	Phishing-led	No AI · no EU AI Act
Adaptive Security WATCH	AI-aware SAT — deepfake-led	Closest in messaging	US-positioned · premium · not EU-AI-Act-led · no MSP wholesale
Hornetsecurity (Proofpoint)	Email security + SAT bundle	Cross-sells SAT	SAT is upsell · not the lede
Immersive	Cyber skills training	Hands-on technical	Practitioner audience · not SMB end-user
TryHackMe	Cyber skills labs	Hands-on technical	Practitioner audience
SANS	Gold-standard practitioner training	Cert authority	\$\$\$\$ · practitioner not staff · no EU AI Act course yet
SecureFlag	Secure-coding training	Developer audience	Wrong audience
Antisyphon	Pen-test training	Practitioner	Wrong audience

Pattern: Awareness vendors treat AI as a *module* inside a phishing-led library. **Nobody leads with EU AI Act Article 4 literacy as the core product.** Closest is Adaptive Security — US, deepfake-led, premium. Differentiator window stays open.

2b · Direct competitors — AI Governance platforms

VENDOR	WHAT THEY DO	WHERE THEY OVERLAP	WHERE THEY'RE WEAK VS US
Securiti AI	Data + AI governance platform	EU AI Act module	Enterprise platform sale (\$50k+) · not literacy
OneTrust	Privacy + AI Governance suite	Adds AI Gov to GRC	Enterprise legal-team buyer · not staff training
Concentric AI	AI-powered data security	Shadow-AI detection	Technical · not human-layer
Diligent	Board-level GRC + AI risk	Board reporting	Boardroom audience
Compyl · Sprinto · Vanta	ISO 27001 / SOC 2 automation	AI Gov modules added	Automates audit evidence · not literacy

Pattern: AI-Governance vendors sell *policy engines* to *legal / compliance teams* at *enterprise prices*.
Nobody delivers AI literacy training to SMB staff at MSP-friendly price points.

3 · Coverage gap analysis

3a · Where competitors have something we don't

GAP	OWNED BY	OUR POSITION
Live phishing simulation engine	KnowBe4 · PhishRod · Sublime · Abnormal	Have content · no simulator. Out of scope · partner play
Per-seat LMS + completion reporting at enterprise scale	KnowBe4 · MetaCompliance · Immersive	Static HTML today · Pro Cert tier closes for individuals · SCORM pack on roadmap closes for enterprise
AI model red-team / DAST-for-LLM	Mindgard · DeepKeep · Validaitor · NeuralTrust	Deliberately out of scope · wrong audience
Technical DLP enforcement on AI prompts	Harmonic · LayerX · Cyberhaven · Metomic	Out of scope · we teach behaviour, they enforce it · complementary
AI policy automation depth	OneTrust · Diligent	Partially covered via AUP template · enterprise-policy depth deliberately not built
Deepfake simulation	Adaptive Security	Module 6 + 11 teach principle · no simulator · partner play

3b · Where we have something competitors don't (or downplay)

DIFFERENTIATOR	WHY IT HOLDS
EU AI Act Article 4 literacy as the lede	Art 4 entered force 2 Feb 2025 · obligation on every deployer · nobody at Infosec Europe leads with it · Adaptive = deepfake · KnowBe4 = phishing · OneTrust = policy
EU-first plain-English standards map (EU AI Act + GDPR + ISO 42001 + ISO 27001 + NIST AI RMF + OWASP LLM Top 10)	Most SAT vendors stay US-NIST · AI-Gov vendors stay enterprise-policy · free /standards-map.html aimed at auditor is uncommon
Non-technical SMB framing for AI specifically	SANS / Immersive / TryHackMe = practitioner · KnowBe4 = generalist · we are the only "AI specifically" awareness course aimed at SMB end-user staff member
Free core + public DOCTRINE.md + citation bibliography + anti-scrape verification log	Nobody else publishes governance posture publicly · audit-readiness signal differentiates on trust
MSP-resellable shape · £499 / £1,499 / £3-5k tiers · revenue-share · Founding Partner programme	KnowBe4 has channel but premium · nobody offers SMB-priced AI-literacy + AI-policy bundle MSPs can resell
Layered AI-crawler policy (training-blocked · citation-allowed)	Cited by ChatGPT / Claude / Perplexity for "EU AI Act SMB literacy" without feeding training corpora · distribution wedge
Article 4 + DPIA + FRIA scoping in single deliverable	DPO track does this · OneTrust does it in \$50k+ platform

4 • The defensible niche

ONE-LINE WEDGE

The Article 4 AI-literacy pack KnowBe4 doesn't ship and OneTrust doesn't sell — built for SMB staff, priced for MSP resale, evidenced for the EU auditor.

Three reasons it holds against the 20 direct competitors at Infosec Europe:

1. **Regulatory anchor with a date.** EU AI Act Article 4 (literacy obligation) entered force 2 February 2025. Every deployer — SMB included — must demonstrate it. No exhibitor leads with this. We do.
2. **Audience nobody serves end-to-end.** SAT vendors serve generalist staff (phishing-led). AI-Gov vendors serve enterprise legal teams. Model-security vendors serve MLOps. **SMB end-user • learning AI specifically • with EU framing — nobody owns it.**
3. **Price + channel shape no incumbent can match without cannibalising.** KnowBe4 cannot drop to £499/mo wholesale without nuking enterprise margin. OneTrust cannot strip down to staff literacy without diluting platform narrative. Bottom-of-market AI-literacy slot is structurally open.

5 · Partner targets at Infosec Europe

Stands worth a 15-min pre-show conversation or in-person walk-up. Referral · channel · co-sell, not competitive.

PARTNER TYPE	SPECIFIC STANDS	WHY
MSP-channel tooling	N-able · NinjaOne · Atera · ManageEngine · ThreatLocker · Huntress · Action1 · Admin By Request	Their MSP partner directories are our distribution · AI Safe@Work sits on the menu next to RMM + patching
UK / EU distributors	Bytes · Distology · QBS Software · Northamber · Infinigate · Softwerx	White-label / wholesale route to MSPs at scale
GRC + TPRM platforms	Vanta · Sprinto · Compyl · OneTrust · Risk Ledger · UpGuard · Setyl · Plainsea	Plug the "AI literacy evidence" gap auditors ask about · they get the artefact · we get the lead
Identity bundlers	1Password · Keeper · LastPass · Yubico · JumpCloud	Bundle AI literacy with password / MFA training in a single SMB offer
AI-policy adjacents	OneTrust · Diligent · Concentric AI · Securiti	Refer us their staff-literacy ask · we refer them enterprise-platform deals
Insurance / BC adjacents	Resilience and Cyber Risk · FAIR Institute · KPMG CRI	Cyber-insurance discount triggers ride literacy evidence
UK regulatory + cert	IASME · UK Cyber Security Council · Cloud Security Alliance · ISC2 · ISACA · CIISec	CPD credit + Cyber Essentials adjacency · credibility ladder

6 · Competitor watchlist — post-show monitoring

VENDOR	WATCH FOR	MITIGATION IF THEY MOVE
Adaptive Security PRIMARY	Pivots from US-deepfake to EU-AI-Act framing	Lock in EU-first SEO + MSP partner ratchet before Q3
CybSafe	Adds AI module to behavioural-SAT library	Ship standards-map deeper + Qualiopi cert
KnowBe4	Launches dedicated "AI Act" course inside platform	Ride MSP wholesale + audit-pack transparency · KnowBe4 won't price-match channel
MetaCompliance	Launches AI Act compliance pack	Beat on plain-English + free core + citation transparency
OneTrust	Bundles a staff-literacy module into AI Governance	OneTrust won't ship MSP-friendly · partner instead
Securiti AI · Concentric	Adds awareness front-end to data platform	Same — partner not compete

7 · Actions

#	ACTION	OWNER	DUE
1	Reframe homepage lede to lead with "EU AI Act Article 4 literacy, plain English, MSP-delivered" · keep current AI-Gov framing as secondary	Founder	2026-06-15
2	Add <code>/article-4.html</code> deep-link page citing Article 4 verbatim + plain-English summary + 5-minute compliance proof	Founder	2026-06-30
3	Pre-show outreach to top 8 partner targets (Vanta · Sprinto · N-able · NinjaOne · ThreatLocker · Huntress · 1Password · Yubico) with one-pager + Founding MSP Partner deck	Founder	2026-06-03 (pre-show)
4	Visit Infosec Europe in person (3-4 June 2026, ExCeL London) · target 14 SAT stands + 6 AI-Gov stands to confirm positioning gaps · collect collateral for competitive log	Founder	2026-06-04
5	Add "Adaptive Security watchlist" entry to <code>.audit/market/competitor-watchlist.md</code> (new file)	Founder	2026-06-15
6	Update DOCTRINE.md § Position-wedge to canonicalise Article 4 as the regulatory anchor	Founder	2026-06-15
