Proposed pricing under assessment

TEAM SIZE	FOUNDATION (ANNUAL)	PLATFORM (MONTHLY, BILLED ANNUALLY)
Up to 25 staff	£990/yr	£249/mo (£2,490/yr)
26–100 staff	£1,750/yr	£499/mo (£4,990/yr)
100+ staff	Contact us	Contact us

What comparable platforms actually charge

COMPARATOR	WHAT IT IS	PRICE FOUND	ATTEST AI EQUIVALENT
DataGuard	GDPR/compliance platform + experts (closest analogue)	from ~€175/mo basic; typical deals quote-only €2k–€20k/yr	Platform £2,490–£4,990/yr sits in its lower-middle
Vanta	Compliance automation (SOC 2 / ISO)	~\$10k/yr entry (~£8k)	~40–70% cheaper
Drata	Compliance automation	~\$7.5k–15k/yr entry (~£6–12k)	~50–60% cheaper
KnowBe4	Awareness training only, per user	~\$20–30/user/yr list (negotiated lower)	Training-only anchor: 25 users ≈ £400–600/yr
CyberSmart	UK SME security/compliance	listed £49–99+VAT/user/mo (treat cautiously — implies £14k+/yr for 25 users, far above their historic org-level positioning)	Either way, Attest is well under
Cyber Essentials cert	One-off certification	from ~£320	Context: what UK SMEs already pay annually

Reassessment

VERDICT

Tier 2 (Platform) is priced correctly — if anything, conservatively. At £4,990/yr for a 100-person company that is **£50 per employee per year** for a live governance platform *with all-staff training included* — where KnowBe4 charges £20–30/head for training alone, and Vanta/Drata charge £6–12k for platforms with *no* training. The quarterly-updated content is exactly the argument that justifies subscription over one-off; at these prices Attest undercuts the category while carrying a differentiator the category doesn't have.

- Keep £249/£499 for launch.** As an unknown startup with zero customers, being 40–60% below Vanta/Drata is the wedge. **£499 → £599 for the 26–100 band is a defensible post-validation move** (still half of Drata's entry) — bank it for after the first 5–10 customers, not now.
- Put the differentiator on the grid itself.** A line under the Platform column: *"Documents and registers updated at least quarterly as the EU AI Act and standards move — your governance never goes stale."* That answers

"why subscribe instead of buying templates once", and no comparator can say it about AI governance specifically.

Foundation at £990/yr (≤25 staff) is also sound: £40/head at full band versus KnowBe4's £20–30 for training-only — the certificate + starter templates close the gap. At very small headcounts (5 staff = £198/head) it is steep; if early enquiries stall there, the answer is a later "1–10 staff, £590/yr" row — but do not add it pre-emptively; let real "too expensive" objections create it (the council's experiment principle).

Startup-specific addition: a visible "**Founding customer**" offer — first 10 customers get 20% off, price locked for 2 years, named as design partners. It converts the zero-customer weakness into an early-adopter incentive without lowering list price; the logos are worth more than the margin at this stage.

Net: keep the grid as agreed · add the quarterly-update line under Platform · hold £599 in reserve · optionally add the founding-customer banner.
